

**2021-2022 PREP GUIDE**

## COLLEGE PLANNING IN 9TH GRADE

## COLLEGE PLANNING IN 10TH GRADE

## To Do's for Parents of High School Freshmen

**Talk to your child about college.** Encourage them to think about what they'd like to study or do one day as an adult. These certainly don't need to be plans — their major and career path will change many times before it settles into its final form — but this kind of talk will help get your student excited about college.

**Keep an eye on your student's grades and activities.** Do your best to keep an eye on their performance, checking in on a weekly basis to see how things are going in school and where they are struggling. Try not to hover during this process. It's important to make sure your student is trying in school and getting the help he/she needs, without putting them under unnecessary pressure.

**Look into college costs for your family.** Keep your estimated costs in mind and get your family to start saving if you haven't already. Be prepared to do a lot of research into paying for college and arranging scholarships. College isn't cheap, but it can be made more affordable through research and balancing options.

**Let your kid be a kid.** At 14, your student may technically be a teenager, but he or she is still closer to childhood than to adulthood. Remember that the days may be long but the years are short, and make sure to give your student the time and space needed to still be a kid amid the beginnings of college prep.

# CHOOSING A CAREER

## 1. KNOW WHAT YOU LIKE & ENJOY WHAT YOU DO

Think about your passions, likes and dislikes. Don't limit thinking to just schoolwork but also think about extracurricular or household activities. This will help you to choose a career that you will enjoy.

## 2. CONSIDER YOUR STUDENT LOAN DEBT-TO-INCOME RATIO

Studies prove education does pay; however, it is a long-term investment and you may need to borrow money. Financial experts recommend that you limit your debt to no more than 15% to 20% of your take-home pay. Research your potential major and career online to investigate what one may make and compare this to what college will cost you.

## 3. KNOW THE JOB MARKET

When looking at possible careers, take a look at the projected growth and demand along with current unemployment trends. The U.S. Department of Labor keeps a good handbook. Check <https://www.bls.gov/ooh/most-new-jobs.htm>

## 4. IT'S NOT A REST-OF-LIFE DECISION

Choosing a major or training option does not lock you into a career for the rest of your life. A credential equips you with a desirable set of skills and abilities that can be applied to any number of employment opportunities.

## CONSIDER GETTING AN INTERNSHIP

With an internship, you'll experience working for a company or organization. They usually last a set amount of time — like a semester or a summer; some are full time and others may only be a few hours a week — and are typically available for college students, but more organizations are creating internships for high school students, too. Some internships may offer stipends or payment but, even if they don't, it can definitely pay off in experience and networking. It may even land you a job later. Most colleges or universities have a career services office or department that can help you find internship opportunities in your field. Another way to search is by going directly to the companies you're interested in working for.
